Dry Creek Bed Nature Based Inclusive Play Space

Yackandandah Primary School Council seek sponsors to assist us with improving our educational environment by providing a high-quality, inclusive and accessible nature based sensory play space that supports the learning needs of every student.

The project aims to:

- provide students with an appreciation of their natural environment;
- build awareness of local history;
- strengthen the sense of belonging and identity; and
- contribute to students physical and mental development and wellbeing.

The design is based on a dry creek bed and incorporates accessible paths, optional circulation routes, a gathering circle, granite boulders and mounds, balance circuit, bush tucker garden, a stone sculpture representing the origins of 'Yackandandah', and Australian native plantings.

The play space is designed for the corner of the school fronting High Street and Wellsford Street. The project aims to be completed by the end of the 2021 calendar year.

The design has been developed by local Landscape Designer Jenny Kjar in consultation with School Council, Teachers, Students and the Principal.
